

Ventilmotor s.r.l. has set itself the goal of developing increasingly innovative products by expanding the sectors in which it operates. To achieve and maintain these objectives over time, the company has adopted a Quality Management System based on UNI EN ISO 9001 standards.

The Company Management System was developed to ensure the effective and efficient use of resources, focusing on the expectations of customers and other stakeholders.

Directives and objectives:

- Adopt and maintain an effective Quality Management System in the processes, products and services of the context in which it operates, in compliance with the legal requirements of the applicable regulations and in compliance with other provisions that the Company decides to voluntarily subscribe to;
- define the responsibilities assigned to all company functions, verifying that they have been understood and applied;
- motivate and involve all staff to develop an ever-increasing awareness of the importance of their role, promote shared values and correct behavioral models aimed at reducing the risks associated with the activities performed;
- define and disseminate clear, documented information to ensure effective and efficient process operation and product control, including in terms of occupational health and safety and environmental issues;
- understand and strengthen relationships with customers and other stakeholders, improving their satisfaction through products and performances that meet expectations;
- identify the causes of non-compliance and ensure rapid and effective responses;
- carry out inspections to measure the implementation and effectiveness of the Quality Management System and its compliance with this Policy, ensuring the adoption of appropriate corrective actions to remove any causes of inadequacy of the Management System;
- select and qualify suppliers of products and services that have an impact on the final quality of processes and products, involving them, to the extent of their competence, in achieving company objectives
- identify technological innovation needs to develop new products and processes in accordance with market expectations.

Ventilmotor s.r.l. managers must implement and disseminate the commitments and directives listed above by developing activities aimed at achieving the objectives, with availability and absolute rigor in the timely resolution of any issues, as indicated by the Quality Management System.

This Policy must be made available to all internal and external interested parties.
